I live in Weston and was out of power for 7 days straight! My insurance will not pay for the food I lost. I was inconvenienced, as my husband has medical needs which require the use of electronic medical equipment. What I don't like about this, is that there was no attempt to get working right away after the storm. I was told that other states were not notified of the need until mid week. Then, I received a bill saying that my payment was late! I have had to pay for the full month of cable, too. We had no power, so we could not use television, Internet or phone service. If this should happen again, what will be done differently?

Respectfully submitted,  
Ellen Horowitz
