Inclusive Stakeholders' based processes & platforms

UN Food Systems Coordination Hub Country Needs Analysis Survey

The views of your government, together with in-country stakeholders, as expressed in national dialogues, pathways and statements at the summit, and now during the follow-up period, are essential inputs to the shaping of an effective Work Plan for the Hub. When responding to this survey, you are encouraged to discuss the survey questions with your wider team, and - as relevant - the respective UN Resident Coordinator and the UN Country Team.

Thank you in advance for your time and valuable input to help us better serve you.

We look forward to continuing an active and fruitful collaboration!

The Hub: Services

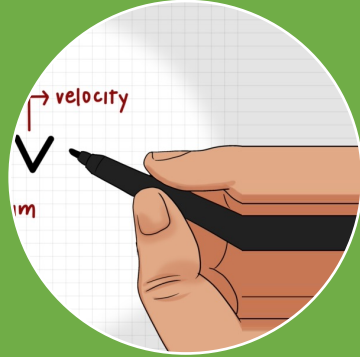

What Support the Hub might need

Connecting country needs with expertise from Coalitions and other “solutions providers” from the ecosystem of support.

Initial operations.

Strengthening the UNCTs capacity to provide support for a food systems approach in the national development planning, maintain the momentum and keep the national dialogues active.

Seed funding

Demonstrating the food systems approach benefit through pilot interventions around thematic areas that emerge from country demands (e.g. linking food systems with climate, health and biodiversity issues).

Larger projects.

Ensuring a results oriented Stock-Taking Moment of 2023. Progress on national pathways.

Momentum of food systems.

Convening support
