LG BOLC Training Strategy

- ✓ Standard block of instruction across three base branches (QM, OD, TC) to prepare for multi-functional logistics assignments
- ✓ Implementation of Data Visualization
- ✓ Realistic logistics based tactical scenarios into BOLD Challenge FTX
- ✓ Physical Readiness (Must Pass ACFT, 4x36, 12-mile foot march, Crucible)
- ✓ Community Outreach and Service to the local community

**the list is not all inclusive*

LG BOLC Training Strategy

Individual

Presence

LG BOLC lays the foundation for individual lethality thru **M4 Qualification and basic rifle marksmanship**. Lieutenants also gain familiarity with the M240B/M249 weapons systems. These skills will be applied at the small unit and platoon levels as they encounter realistic tactical logistics situations during BOLD Challenge (LRPs, Convoys, CTCP Defense).

Small Unit

Intellect

Preparation for LSCO requires proficiency at fundamental skills like land navigation. All LG BOLC lieutenants are required pass a 6 out of 8 **land navigation test** night into day in order to meet graduation requirements. Furthermore, lieutenants demonstrate proficiency at **small unit and individual movement techniques, dismounted formation types, and hand arm signals**. This foundation sets the stage for **tactical convoy, ATHP, and Recovery operations** during BOLD Challenge FTX.

Platoon

Character

LG BOLC culminates in a training exercise testing lieutenant **decision making** and **logistics skills** learned throughout the course. Lieutenants deploy to an operational area that requires logistics support BDE and below. **The tactical setting** requires lieutenants to conduct **tactical convoys, tactical logistics resupply, and reinforces logistics processes** (LOGSTATs, synchronization) in a contested environment.
