Legend:

- In red the changes in the substance name and/or identifiers and the changes in the initial concern was indicated
- (*) Further concerns may be identified during substance evaluation process.
- (**) The substance identifiers may change as a consequence of the clarification of the registered substance identity by ECHA.
- (^) Without prejudice to the outcome of the negotiations concerning the withdrawal of the UK from the EU.

POTENTIAL GROUPS: (The coloured rows indicate structurally similar substance that should be evaluated together or for which the common evaluation strategy should be agreed between eMSCAs)

G1: (EC: 215-175-0; 215-713-4; 231-146-5; 249-820-2; 233-047-2) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

G2: (258-904-8; 262-872-0) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

G3: (EC: 215-535-7; 905-562-9; 905-588-0) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

G4: (EC: 241-867-7 and 217-496-1) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

G5: (EC: 202-773-1; 202-826-9; 246-835-6) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

G6: (EC: 218-747-8; 245-366-4) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

G7: (EC: 283-044-5; 405-420-1; 938-828-8) due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation. Furthermore the evaluation may also refer to other structurally similar substances: EC 214-625-3, intermediate and substance EC 283-041-9 with no active registration at this moment.
