Article Title

Title Botanical Survey of Nebraska  
Conducted by the Botanical Seminar

Periodical

Volume: Number I. Preliminary: The Plan and Scope of the Survey

Date 1892

Publisher Lincoln: by the Seminar

Pages 8pp.

Description Lays out the plan for the survey ( "It is the intention of the Seminar to make a thorough and complete survey of the state, extending over several years and covering all forms of plant life.") They were especially concerned that settlement was causing rapid changes in the plant life of the state and that their work must be done at once "while the native flora is intact."

THE PRAIRIE-GRASS FORMATION IN REGION I

BY JOHN J. THORNBER

An obsessively detailed examination of an 800 x 800 meter prairie three miles southwest of Nebraska City. Every possible factor is discussed, many plant lists, and maniacal maps. It would be interesting to identify this plot and reexamine it for any remaining species after urban sprawl and cultivation.

Publisher Minneapolis: University of Nebraska

Pages 189-312

Description This is Pool's Doctoral Thesis (accepted March 14, 1913).  
In depth study with maps and, charts, line drawings, and lots of photographs (including plate XXXII, fig. 2: "The blow-out Penstemon, *P. haydeni*, a common plant of blow-outs").  
The definitive study at that time, it builds on Rydberg's 1895 work.
