34 horses are a rich part of our State's historical and cultural heritage.
- 35 (2) The inclusion of an Equine State Trail as a State trail in the State Parks System

11 were full of grapes and the soil of the land was "so abounding with sweet trees
12 that bring rich and most pleasant gummies, grapes of such greatness, yet wild
13 as France, Spain and Italy hath not greater..."
14 (3) The thick skins, fruit seed, and sweet pulp and juice that characterize
15 Muscadine grapes make the native fruit a state treasure.
16 (4) In recent times, researchers have discovered that Muscadine grapes are rich in
17 antioxidants and phytochemicals, including resveratrol, among many others.

31 (h) Accepted Wastewater Dispersal Systems. – A manufacturer of an Innovative
32 wastewater dispersal system or other approved trench dispersal system specifically identified in
33 a rule adopted by the Commission that has been in general use in this State for a minimum of
34 five years may petition the Commission to have the system designated as an Accepted wastewater
35 system as provided in this subsection. The manufacturer shall provide the Commission with the
36 data and findings of all prior evaluations of the performance of the system in this State and other
37 states referenced in the petition, including disclosure of any conditions found to result in
38 unacceptable structural integrity, treatment, or hydraulic performance. In addition, the
39 manufacturer shall provide the Commission with information sufficient to enable the
40 Commission to fully evaluate the performance of the system in this State for at least the five-year
41 period immediately preceding the petition. The Commission shall designate a wastewater
42 dispersal system as an Accepted wastewater system only if it finds that there is clear, convincing,
43 and cogent evidence based on actual field surveys and county activity reports (i) to confirm the
44 findings made by the Department at the time the Department approved the system as a wastewater
45 dispersal system and (ii) that the system performs in a manner that is equal or superior to a
46 conventional or Accepted wastewater system under actual field conditions in this State. The
47 Commission shall specify the circumstances in which use of the system is appropriate and any
48 conditions and limitations related to the use of the system. However, the Commission shall not
49 include more restrictive conditions and limitations established in the approval of a wastewater
50 system as Accepted that are not included in the approval of the wastewater system as Innovative.

1 If the Department designates a wastewater dispersal system as an Accepted wastewater system
2 pursuant to this section, the following shall apply:

3 (1) The approval shall be limited to the manufacturer who submitted the petition
4 and received the Accepted status from the Commission.

5 (2) Neither the Commission, the Department, or any local health department shall
6 condition, delay, or deny the substitution of any Accepted wastewater system
7 based on location of nitrification lines when all parts of the dispersal field can
8 be installed within the approved initial dispersal field area while complying
9 with all Commission rules.

10 (i) Nonproprietary Wastewater Systems. – The Department may initiate a review of a
11 nonproprietary wastewater system and approve the system for use as a provisional wastewater
12 system or an innovative wastewater system without having received an application from a
13 manufacturer. ~~The Department may recommend that the Commission designate a nonproprietary~~
14 ~~wastewater system as an accepted wastewater system without having received a petition from a~~
15 ~~manufacturer.~~

17 (j2) Clarification of Use of Native Backfill. – In considering the use of backfill material
18 in subsurface trench dispersal products, neither the Commission nor the Department shall
19 condition, delay, or deny the approval of a subsurface trench dispersal product based on a
20 non-native backfill material requirement without the prior approval of the manufacturer. With
21 respect to approvals already issued by the Department or the Commission that include conditions
22 or requirements specifying the use of non-native backfill material, the Department or
23 Commission, as applicable, shall reissue those approvals, at the written request of the
24 manufacturer, without conditions or requirements relating to the use of non-native backfill
25 material.
