

Report of car following voter registration workers - July 6, 1964

Thomas Chetman and Roger Barnhill were distributing leaflets at the corner of East and Main St., concerning the mass meeting tonight, and saw the car concerned (to be described later) stopped and the driver talking to the policeman in his car. They stayed there talking until Roger and Thomas walked by them distributing the leaflets. The boys took their license numbers and came to the office and reported the number and description. They went back to the same EG area; the policeman and the other man weren't there. The man in the car came back, passed by Thomas, who saw a pistol on the seat of the car. This same car has been seen before around the office, and was acting suspiciously enough to be put on our suspicious car list. The description is as follows:

.Green-colored Ford Galaxie, '63 or '64, Alabama License 2A10103
