

Please be advised that the new monitoring requirements for perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), resulting from the June 1, 2020 Amendments to the New Jersey Safe Drinking Water Act rules at N.J.A.C. 7:10-5.2, become effective January 1, 2021.

**PFOA, PFOS, and the currently regulated PFNA are regulated as a group, and monitoring schedules will be set as a group including all three (3) analytes. The group is called "REGULATED PFAS" and has analyte code "PFSR".**

The Bureau of Safe Drinking Water is in the process of updating your monitoring schedules on Drinking Water Watch (DWW) and you will be receiving a letter with your new requirements within the next few weeks.
