The Executive Officer (EO) of the California Regional Water Quality Control Board, Colorado River Basin Region (Regional Water Board) hereby provides the following report on recent staff activities for June and July 2024 in the region:

1. LAND DISPOSAL – WASTE DISCHARGE REQUIREMENTS PROGRAM

New River Sampling: During the months of June and July 2024, staff from the Land Disposal Unit coordinated the New River Sampling Program by preparing sample bottles, coordinating lab contracts, and assisting in record keeping. Emma McCorkle and Ryan Culhane of the Water Quality Standards Unit went to the sampling location on June 24, 2024, but were not able to access the sampling station due to construction equipment and excavation on the New River Improvement Project. Water Quality sampling was not performed. Jose Figueroa and Daniel Echeverria of the NPDES Unit performed New River Sampling on July 16, 2024. Imperial County [*Julya Mestas, WRCE*].

Correspondence: Land Disposal Unit staff issued correspondence to dischargers regulated under Waste Discharge Requirements (WDRs) for: analysis of technical reports, providing comments and/or approving work plans in accordance with WDRs, notices for violation of WDRs, notices of applicability for enrollment in general orders, and notices of termination of enrollment in general orders. The following table lists correspondence and notifications addressed to WDR and Land Disposal facilities issued in June and July 2024.

2. WATER QUALITY/NON-POINT SOURCE PROGRAMS

Colorado River Basin Salinity Forum Work Group

The Colorado River Basin Salinity Forum Work Group met June 3-4, 2024 in person in Durango, CO and virtually on Zoom. This meeting was held prior to the Salinity Forum's spring meeting on June 5-6, 2024. The Work Group discussed legislation to fix the cost share issues that are impacting the Control Forum's budget. There was discussion regarding a new national monument in New Mexico which could halt salinity control measures in that area and impact downstream users. Federal agency partners provided updates on activities such as funding program issues, recent studies, updates to stream data network, and changes to the salinity modeling program. Proposed studies for available funding were also discussed with recommendations for three projects to be funded. [Emma McCorkle, SES]

Salton Sea Water Quality Monitoring

On July 16, 2024, staff joined California Department of Fish and Wildlife's boat crew and science team for water quality sampling at the Salton Sea. Staff visited two sites at the southern end of the Sea and took water samples to be analyzed for multiple pollutants including bacteria, nutrients, and pesticides. This is part of an ongoing sampling effort to obtain data on the water quality of the Salton Sea consistent with the Salton Sea Management Program. [Emma McCorkle, SES]

3. UNDERGROUND STORAGE TANK AND SITE CLEANUP PROGRAM

Regional Water Board staff continues to work with staff from the Department of Defense (DoD) to expedite ongoing activities at cleanup sites located at military

facilities within the Colorado River Basin Region. The UST and SCP staff issued correspondence reviewing technical reports, requesting site access, providing direction for site assessment, and approving remedial action plans for sites currently in the assessment and cleanup process. The following table lists the correspondence regarding DoD, UST and SCP projects issued in June and July 2024.

4. NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PROGRAM

New River Improvement Project

On July 31, 2024, the City of Calexico submitted a Notice of Termination requesting that the New River Improvement Project be disenrolled from under the Regional Board's General Waste Discharge Requirements for Low Threat Discharges to Surface Waters (Order No. R7-2015-0006). The enrollment permitted the discharge of dewatering wastewater resulting from the installation of the New River Improvement Project's trash screen and diversion structure, the pump-back system's pump station, and the 72-inch bypass pipe. The City reported that the last discharge occurred on July 3, 2024. The City is continuing to work on other aspects of the New River Improvement Project and expects to complete the Phase 1 elements by December 2024 or early 2025. [Logan Raub, SES]
