Subject: Extension of Group Water Quality Plan Monitoring Report Deadline

Dear Interested Parties,

In November 2020, the deadline for the Group Water Quality Monitoring Report was revised to January 2024.

Due to a prolonged 2023 wet weather period, data collection has been delayed. At the request of Napa Resource Conservation District staff and with the support of Regional Water Board staff the deadline for submittal of the Regional Group Water Quality Plan Monitoring Report shall be extended to July 15, 2024.

This approval is made under the authority specified in Attachment E (Monitoring and Reporting Requirements) of the General Permit, which states that the Executive Officer may modify Attachment E as necessary and appropriate. Upon approval of the monitoring report, our agency will also specify the remaining duration of streambed monitoring, if ongoing monitoring is necessary.

Public notice of this approval and related revisions to Attachment E will be provided to interested parties and posted on our website. If you have any questions, please contact Graham Brown of my staff at graham.brown@waterboards.ca.gov.

Sincerely,

Eileen M. White

Eileen White
Executive Officer
